

Canadian Military Camps Hit by Spanish Influenza.

TORONTO, Oct. 4.—Spanish influenza is epidemic in the eastern part of the Province of Ontario. It has spread over part of Quebec and is also reported from the military camp at Niagara-on-the-Lake, the aviation barracks in Toronto, Kitchener and London, Ont. In Quebec it is confined largely to the military population.

COMB SAGE TEA IN FADED OR GRAY HAIR

If Mixed with Sulphur it Darkens so Naturally Nobody can Tell.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful. This preparation is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.—Advt.

COAL LEAGUE ASKS GARFIELD TO TAKE OVER CULM BANKS

Consumers' Organization Urges Mountains of Fuel Be Used for Nation's Benefit.

(Special Despatch to The Evening World.) POTTSVILLE, Pa., Oct. 4.—In response to the appeal of Fuel Administrator Garfield for an increased output of coal, the Anthracite Consumers' League is urging Dr. Garfield to take control of the immense mountains of steam coal in this region and utilize the product for the benefit of the Nation.

The league calls attention to the fact that the Delaware and Hudson Company, which controls many of the best culm banks in this country, has no railroad leading to the banks, and therefore cannot utilize the product, even if it desired to do so.

All offers for the purchase of these banks, as well as those owned by many other companies, have been refused, leaving the impression that they are being held for the purpose of profiteering in an hour of vital need of the Nation.

As the transportation problem will again become one of the big factors in coal production with the opening of winter, the league suggests that all towns and cities of Pennsylvania con-

tiguous to the anthracite region be allowed to transport as much of this fuel from this region as can be hauled in motor trucks.

Because of the allotment of the Fuel Administration of a certain amount of coal for each town, to be sent by rail, it is not possible, the league concludes, for towns outside the region to send to the coal region and buy coal for motor transportation themselves, because this would disturb the basis of calculation.

Much of the coal from these mountains of fuel can be transported without any previous preparation, declares the league, as the coal is fitted for steam purposes at any plant whose boilers are equipped with blowers.

By taking possession of these banks on behalf of the Government, the league estimates that hundreds of thousands of tons of coal can be added to the amount available for use next winter and greatly relieve the economic situation.

But the most important result of the movement, it is declared, would be the demonstration by the Government that this quality of coal, now reposing on the surface in the anthracite region by the millions of tons, can be marketed at figures far below that now demanded by the Coal Trust.

"One month of Government experimentation with this product will show the immense profiteering that is being imposed on the American people by the demand of the highest prices for coal which can be produced for far less than half the cost of freshly mined coal," declares the league.

WASHINGTON THEATRES CLOSED BY EPIDEMIC

WASHINGTON, Oct. 4.—Washington theatres were closed today. As a precaution against the spread of Spanish influenza the District Commissioners, acting on Federal advice, have ordered all theatres and public dance halls not to operate until further notice. Deaths yesterday totalled eleven.

All places of amusement and recreation in Pennsylvania were closing their doors today under an emergency order issued at Harrisburg by H. Franklin Royer.

Houston and many New England cities and towns closed their theatres some time ago, while Baltimore took similar action.

Spanish influenza is now reaching into the far corners of the earth. A State Department message noted its presence in Tehran, Persia, and quinine, an important remedy, now retails there at \$125 a pound.

PHILADELPHIA BONE DRY.

PHILADELPHIA, Oct. 4.—Influenza is on the increase in Philadelphia, 728 new cases having been reported in the last twenty-four hours. As a result of the epidemic Philadelphia will have a "bone dry" for the first time in its history. Saloons, cafes, wholesalers and manufacturers were given until that hour to close out the stock on hand and put up their shutters for an indefinite period, in compliance with an order issued by the State Health Authorities.

All the courts in Philadelphia, adjourned today until the 11th. The Grand Jury was dismissed. The big football game scheduled for tomorrow between University of Pennsylvania and the United States Marines was called off. All Liberty Loan meetings have been called off.

STATE STARTS GRIP FIGHT.

ALBANY, Oct. 4.—At the request of the Health Commissioner, Gov. Whitman today made available \$50,000 for nurses and physicians to treat a large number of influenza patients who would otherwise be uncared for.

Two small villages, Schuylerville and Victory, today reported three hundred cases, with but three physicians to care for them.

With between 3,500 and 10,000 cases of influenza in the State outside of New York, the situation is regarded as serious. An extra staff of nurses is being organized to be sent out on emergency calls.

JUDGE HAS INFLUENZA.

Judge Otto A. Rosalesky of General Sessions is one of the latest victims of Spanish influenza. Word was received from his physician this morning that he would be unable to attend court for some time and that court would have to be adjourned for an indefinite period. The case of the Hon. J. B. J. Rosalesky, charged with having bought the stolen jewels of Mrs. Pullman had been on before Judge Rosalesky more than a week.

PLAN "STAGGER" CAR SYSTEM HERE IN FIGHT ON GRIP

Employers to Be Asked to Help Relieve Congestion, Influenza Germ's Busy Place.

Realizing the gravity of the influenza epidemic in the city, Commissioner of Health Royal S. Copeland has worked out tentative plans for the inauguration of the "stagger" system, under which employers of labor will be requested to conduct their businesses with overlapping shifts. Congestion, the greatest help in the spread of the influenza germ, will thus be eliminated.

"I sincerely recommend that such a measure be adopted at once," declared Charles Buikley Hubbell, Chairman of the Public Service Commission, when shown a despatch from Washington stating that the Government had acted in that way to relieve congestion on street car lines. The commission has already sent notices to the Brooklyn Rapid Transit officials, as well as the Interborough, to keep all windows open and to continue the use of all fans in trains. Just what will be done after Oct. 15, when the railways are required to heat their cars, is a question, because they can't be expected to heat the trains and keep the windows open and fans running.

After trying to work out some scheme to relieve the menace of influenza because of congestion, Commissioner Copeland addressed the following letter to the Merchants' Association:

"In the City of Dayton, O., where several large companies employ thousands of workers, the transportation of these workers to and from their places of business created a serious problem. Overcrowding with all its evil accompaniments, had grown to considerable proportions before the City Council, co-operating with the manufacturers, took steps to remedy the situation. Arrangements were made whereby certain employees left their places of business earlier than others, with the result that overcrowding has been reduced to a very appreciable degree.

"Having this experience in mind, it has occurred to me to invite certain groups of manufacturing and railroad employees to a conference to discuss plans for the opening of various types of business establishments at certain hours during the period of the epidemic, so as to prevent, as far as possible, the massing of great numbers of people who are all intent upon

business at the same hour in public conveyances.

arriving at their respective working places at the same hour in public conveyances.

"Make I ask your suggestions as to the feasibility of carrying out in this city the plan put into effect in Dayton."

"There is no need at this time to close the public schools," said the Commissioner, "because very few children under 15 years of age have been taken with the disease. The theatres will not be closed at present."

EXPECTORATORS BROUGHT IN

Judges Fine Men Taken in Crusade Against Spread of Influenza.

One hundred and thirty-five men were summoned to Jefferson Market Court this morning in connection with the Health Department's crusade against Spanish influenza and arraigned before Magistrate Brough. They were charged with expectorating in public thoroughfares. Magistrate Brough imposed a fine of one dollar each. He said he hoped the Health Department would continue the raids and that he would deal severely with persons arraigned before him hereafter.

"It is cheaper and cleaner to use a handkerchief," said Magistrate Brough, "as he fined nine delinquents five dollars each and one ten dollars, with the alternative of one day for expectorating in the subway."

Nine men from the lower part of the city, arrested for violating the ordinance against expectorating, were held for the Court of Special Sessions by Magistrate Healy, with bail fixed at \$200 in each case.

Member of French Foreign Legion Dies of Influenza.

KANSAS CITY, Mo., Oct. 4.—Paul Temperli, a member of the French Foreign Legion, sent to America to aid in the Liberty Loan campaign, died last night of influenza.

Town of 500 People Has 300 Cases of Influenza.

WISHAW, Pa., Oct. 4.—This little village, with 500 inhabitants, had 300 cases of Spanish influenza today. Nine deaths have been reported.

Never before have such great reductions been offered to the public. We mean to unload our stock and to do it immediately as we have a 4-year supply on hand which must be sold before the Bone Dry Law goes into effect, so we have cut our prices down to where they create a sensation. We are offering the following list of standard brands at the below prices.
